Press note

EUROSTATE AND LONDON BASED BOX ASSOCIATES CREATE A STRATEGIC ALLIANCE

Eurostate dedicated to real estate management, development and investment, has signed a strategic alliance with Box Associates, headed in London and specialised in fund monitoring, management and quantity surveying of investment projects in the exclusive market.

“This alliance allows us to interchange clients, share knowledge, working methods and offer the best service to our Clients”, confirms Steven Zijl, founder and director of Eurostate. The agreement foresees a further collaboration to respond to the requirements of our clients in England and Spain, as well as in France, Belgium and The Netherlands. David Ledger, managing director at Box, adds that “we have identified a latent demand for exclusive projects on behalf of our international investors and for that reason, through this alliance we are able to cover our services in the South of Europe through the collaboration with Eurostate”. On the other hand, Eurostate is negotiating with several international companies their introduction to the London real estate market.

The two companies are both focused on the commercial, residential, hotel and leisure sector. One of the first projects of BOX-EUROSTATE has been a market and feasibility study regarding an enlargement project of a public yacht club in Marbella with an initial budget of approximately 100 million Euros. The fund interested in the investment, development and exploitation in this new marina scheme is a private investment firm from Kazakhstan. Eurostate, through its modular management structure, was supported by independent experts to elaborate the study and necessary analysis.
